

# **1DESIGN AND ANALYSIS OF FRACTAL MICROSTRIP ANTENNA**

*A report on major project work*

Submitted in the partial fulfillment of the requirements for  
the award of the degree of

**BACHELOR OF TECHNOLOGY**

*in*

**ELECTRONICS AND COMMUNICATION ENGINEERING**

*by*

**U GURUNAG SAI**

**B15EC062**

Under the guidance of

**Sri B.KOMURIAH**

Asst prof, Department of ECE.

**DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING  
KAKATIYA INSTITUTE OF TECHNOLOGY & SCIENCE, WARANGAL**

*(An Autonomous Institute under Kakatiya University, Warangal)*

**WARANGAL – 506015**

**2018-2019**

**KAKATIYA INSTITUTE OF TECHNOLOGY AND SCIENCE, WARANGAL**  
**DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING**

**CERTIFICATE**

This is to certify that the project work entitled “**DESIGN AND ANALYSIS OF FRACTAL MICROSTRIP ANTENNA**” is the bonafide project work carried out by **U Gurunag Sai** bearing Roll No. **B15EC062** in partial fulfillment of the requirements for the award of degree of the Bachelor of Technology from Kakatiya Institute of Technology and Science, Warangal during the academic year 2018-2019.

**Project Guide**

**Sri B.KOMURIAH,**  
Assistant Prof,  
Dept. of ECE,  
KITS, Warangal.

**Head of the Department**

**Dr. G. RAGHOTHAM REDDY**  
Professor & Head,  
Dept. of ECE,  
KITS, Warangal.

## **DECLARATION**

We declare that the work presented in this project report is original and has been carried out in the Department of Electronics & Communication Engineering, Kakatiya Institute of Technology and Science, Warangal, Telangana, and to best of our knowledge it has been not submitted elsewhere for any degree.

**U GURUNAG SAI**

Roll No. B15EC062

## ACKNOWLEDGEMENT

We express our deepest sense of gratitude and indebtedness to our project guide **Sri B.Komuraiah**, Assistant professor, Dept. of ECE, KITS, Warangal for having been a source of consistent inspiration, precious guidance and generous assistance during project work. We deem it as a privilege to have worked under his able guidance. Without his close monitoring and valuable suggestions this work wouldn't have taken this shape. We feel that this help is not substitutable and unforgettable.

We are thankful to B. Tech Project work Convener, **Smt. S. P. Girija**, Associate Professor, Dept. of ECE, KITSW, Project work Coordinators **Syed Zaheeruddin**, Assistant Professor, **B. Narsimha**, Assistant Professor and **P. Chiranjeevi**, Assistant Professor, Dept. of ECE, KITSW for timely conduction of seminars.

We are profoundly thankful to **Dr. G. Raghotham Reddy**, Professor & Head, Dept. of ECE for his constant support and encouragement.

We express our sincere thanks to **Dr. K. Ashoka Reddy**, Principal, KITS, Warangal, for his kind gesture and support.

We are indebted to the Management of Kakatiya Institute of Technology and Science, Warangal, for providing the necessary infrastructure and good academic environment in an Endeavour to complete the project and special thanks for providing Department Library of ECE and Digital Library to access IEEE papers.

**U GURUNAG SAI**

## **ABSTRACT**

Antenna is a transducer designed to transmit or receive electromagnetic waves. Microstrip antenna usually means an antenna fabricated using microstrip techniques on a printed circuit board (PCB). It consists of a conducting patch of any planar or non planar geometry on one side of a dielectric substrate with a ground plane on other side. It is a popular printed resonant antenna for narrow-band microwave wireless links that require semi-hemispherical coverage. Due to its planar configuration and ease of integration with microstrip technology, the microstrip patch antenna has been heavily studied and often used as elements for an array.

For the same patch antenna a new geometry of a rectangular microstrip patch antenna that improves the performance of a conventional microstrip patch antenna. This antenna is designed to operate at 5.38 GHz with enhanced bandwidth of 11.15%. For the desired result, a triangular notch is inserted into the patch antenna. The proposed geometry provides improvement in other radiation parameters like gain, efficiency and impedance behavior, when it is compared with conventional antenna.

### **Software Requirements:**

ANSYS HFSS (High Frequency Structure Simulator).

## TABLE OF CONTENTS

Chapter	Content	Page.No.
	Title Page	i
	Certificate	ii
	Declaration	iii
	Acknowledgement	iv
	Abstract	v
	Table of Contents	vi
	List of figures	vii
	List of Tables	ix
Chapter 1	Introduction	1
Chapter 2	Objective of the project & Literature Review	2
Chapter 3	Antennas	3
	3.1 ANSYS HFSS	3
Chapter 4	Microstrip Antennas	4
	4.1 Basic characteristics	4
	4.2 Advantages,Disadvantages & Applications of Patch Antenna	6
Chapter 5	Fractal Microstrip Antennas	7
	5.1 History Of Fractals	8
	5.2 Natural Fractals &It's Properties	9
	5.3 Advantages And Applications Of Fractal Antenna	12
Chapter 6	Design And Analysis Of Fractal Patch Antenna	14
	6.1 Design Of Basic Rectangular Patch Antenna	15
	6.2 Design Of Fractal Patch Antenna	23
	6.2.1 1st Iteration	23
	6.2.2 2nd Iteration	27
	6.3 The Triangle Patch Antenna	31
Chapter 7	Conclusion	34
Chapter 8	References	35
